

MISSION AND GOALS

Technology Literacy Assessment Project

9-7-08

Mission: *Using assessment of ICT* literacy to promote 21st century learning*

Goals:

1. Determine a common definition, standards, and proficiency criteria for technology literacy that connects to 21st century learning;
2. Develop or adapt a performance-based assessment instrument that addresses the determined standards and proficiency criteria;
3. Develop common procedures for delivery of the assessment that apply to all districts which use the assessment instrument (“participating districts”);
4. Establish mechanisms for reporting assessment results by participating districts;
5. Facilitate development of assessment analysis processes related to acquisition of technology literacy that contribute to increasingly powerful learning;
6. Collect and share information regarding ICT assessment instruments and practices;
7. Promote incorporation of technology literacy acquisition into Colorado content standards and content-area teaching and learning.

* “ICT” — Information and Communications Technology
